## SUMMARY

As a junior Full-Stack Developer with a solid foundation in front-end and back-end technologies, including React.js, Node.js, and NoSQL databases, I have recently completed a BSc in Computer Science, where I developed several web applications and gained hands-on experience in building responsive and user-friendly interfaces. I am eager to apply my skills in a professional setting and contribute to innovative projects as part of a dynamic team.

---

## WORK EXPERIENCE

### BharatNews Coding Assignment

- Developed a modular and dynamic user interface for news content using React components, props, lists, and keys, ensuring a seamless and engaging user experience. Implemented responsive design principles with Bootstrap flex classes and a mobile-first approach, ensuring optimal viewing across various devices and screen sizes.

### MSCAS Team-Based Assignment

- Worked collaboratively with a team to develop and launch an interactive website for MSCAS, gaining practical experience in web development. Played a key role in establishing a strong online presence for the institution, collaborating with team members to ensure the project's successful completion.

---

## EDUCATION

### Mohamed Sathak College of Arts and Science

Aug 2021- jun 2024

Bachelor of Science (Computer Science) -70%

### Government Boys Higher Secondary School

Jun 2020- May 2021

Higher Secondary Certificate-65%

---

## SKILLS

- **Front-End Skills:** HTML , CSS, Javascript, React.js, Bootstrap.
- **Back-end Skills:** Python, Express.js, Mongo Db.
- **Developer Tools:** Vs Code, Git.
- **Soft Skills :** Teamwork , Communication, Problem solving.

---

## LANGUAGE

- English
  - Tamil
-

## PROJECTS

### Linkedin clone – using React.js

( [Link](#) )

Constructed an all-in-one job searching platform

- Developed pages for Login, Home, Jobs, and Job item details with React components, form inputs, and event handlers.
- Ensured secure authentication with JWT tokens and REST API calls.
- Persisted login state using local storage and protected routes with React Router.

### Wikipedia search engine - using javascript

( [Link](#) )

- Styled the list using HTML, CSS and Bootstrap, ensuring responsiveness with Flex properties and the CSS Box model.
- Fetched search results from the server asynchronously using a fetch GET HTTP API call.
- Implemented a feature where clicking on a specific result opens the corresponding page in a new tab.

### To-do list-Build- using react.js

( [Link](#) )

- Developed components for adding tasks, editing tasks, deleting tasks, and marking tasks as complete. Manage the state of tasks within your components.
- Use the browser's local storage API to store the to-do list data locally on the user's device. You can save tasks as JSON objects in local storage
